SELECTED STATISTICAL INDICATORS

OF CARIBBEAN COUNTRIES

VOL. IV

1991

INTRODUCTION

This fourth edition of the document entitled Selected Statistical Indicators of Caribbean Countries serves two purposes. It updates the previous documents' time series while amplifying the coverage of indicators reported on. Also, the tables presented continue to be of interest to institutions and persons wishing to access statistics on the Caribbean countries. The content of the tables is designed to capture the major elements of social and economic developments in the countries over time in figures rather than words. This is not to deny the importance of commentary, but in the face of the extremely high cost of combining commentary with numbers, the present orientation of the document has been favoured, leaving other documents to address the commentary. The present document is therefore seen as a useful adjunct to national or subregional studies that seek to analyze economic and social development in the Caribbean. The tables published here are a part of the contents of the ECLAC/CDCC statistical database and are presented as the priority data set that responds to user requests.

In preparing the tables care was taken to utilize the most authoritative official figures available to ECLAC. Single source and consistent data sets have been preferred to figures from different sources since this approach leads more often than not to internal inconsistencies and confusion in the interpretation of movements in the variables. The tables as presented here aim therefore to eliminate such problems. In a number of cases, updating the tables has led to a complete re-do and re-formulation to reflect a new approach in the country on the revision of those series. The point is forcibly made that updating involves much more than merely appending the most recent year's figures.

While uniformity in the presentation of tables remains an elusive dream, it is clear that the countries have used the modern technologies to improve their reporting of statistics. The softcopy version of this document as developed by the Statistics Unit of ECLAC in Port of Spain is in fact a variable form database, with browse and retrieve capabilities. At least one Caribbean country has utilized this form of dissemination. As more countries do likewise, costs of dissemination of statistics will fall and the ability to command a wider data set on the countries of the Caribbean in a self-running package will become a reality. The ECLAC/CDCC secretariat commends this manner of information transfer to the Caribbean countries in view of its ease of use.

Users desirous of obtaining a soft copy of this document are required to send with their request three formatted 3.5 inch high-density diskettes.

The ECLAC/CDCC secretariat would welcome being informed of any errors or omissions in this document, so that they may be rectified.

Clyde C. Applewhite
Director

SOURCE: Central Bank of Aruba, IMF Staff estimates.

<1> 1985: Data not strictly comparable with subsequent years as statistics up to and including 1986 were before Aruba's Status Aparte when Aruba was still a part of the Netherlands Antilles.

<2> Current revenue for 1986, 1987, 1988 not specified due to different statistical grouping: "Other current revenue" and "capital revenue" were added together making a specification for "current revenue" not possible.

<3> For years 1985-1988 this figure combines Income Taxes and Income Surtax.

<4> For years 1986-1988 this figure combines Other Current Revenue and Capital Revenue.
